

We're Hiring

Postdoctoral Fellowship in Radiation Epidemiology & Cancer Survivorship

Division of Cancer Epidemiology and Genetics

Postdoctoral Fellowship

Study radiation epidemiology & cancer survivorship

The [Radiation Epidemiology Branch](#) is seeking an applicant with training in epidemiology and/or molecular epidemiology to study radiation-related health risks and/or cancer survivorship. Available study populations include individuals exposed to radiation in a number of different scenarios, from patients treated with radiotherapy for cancer to workers with occupational exposures. Projects may include analysis of data from questionnaires, electronic health records, and registries, as well as the study of somatic and germline genomics of radiation-related tumors.

The successful candidate will receive training as needed in interdisciplinary sciences (e.g., radiation epidemiology and dosimetry, biostatistics, medicine, molecular epidemiology) and will be mentored to achieve their goals, progressing to greater independence during the fellowship.

The [Division of Cancer Epidemiology and Genetics](#) is a research division of the National Cancer Institute (NCI), one of the focal points for cancer research at the National Institutes of Health (NIH). The Division is the world's largest cancer epidemiology research group. Its renowned epidemiologists, geneticists, and biostatisticians conduct population and multidisciplinary research to discover the genetic and environmental determinants of cancer and new approaches to cancer prevention.

Qualifications: Individuals must either hold, or expect to soon attain, a doctorate degree in epidemiology or related field. Review of applications will continue until the position is filled.

U.S. citizens, U.S. permanent residents, and international* applicants are eligible for the program. In addition, you must have received your doctoral degree (PhD, MD, DDS, or equivalent) within five years of starting the program. **International applicants should visit training.nih.gov for more information.*

Candidates are subject to a background investigation. DHHS and NIH are equal opportunity employers.

Equal Opportunity Employment: Selection for this position will be based solely on merit, with no discrimination for non-merit reasons such as race, color, religion, gender, sexual orientation, national origin, political affiliation, marital status, disability, age, or membership or non-membership in an employee organization.
